

# Gravitational Anomaly

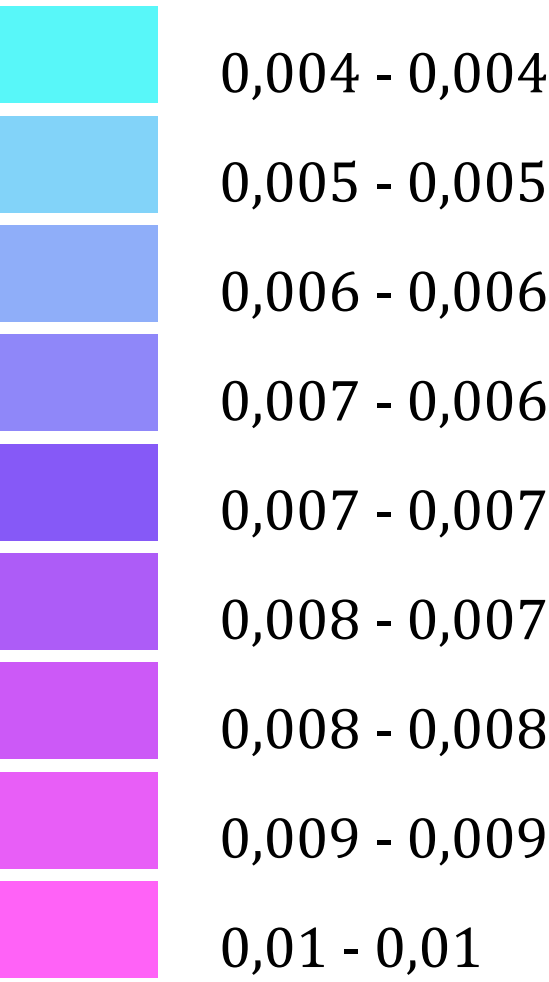

Ścinawa and Surrounding Area

## DESCRIPTION

The map is based on gravity measurements from various points, with correction based on Bouguer anomaly, free-air anomaly (both calculated using table field calculations in ArcGIS Pro), and topographic anomaly (calculated with python). The results have been interpolated.

Code for topographic anomaly available:  
<https://github.com/G3BAB/topographic-anomaly>

## LEGEND

[mGal]  
● Measurement point
